If undergraduate research is used to meet the lab requirement, only three credits may count toward the 10 credit requirement.

Students who successfully complete a Biology Honors Research Thesis have successfully met all three objectives.

Undergraduate Research may be used to meet these objectives. Student must get Research Mentor approval for each objective after that objective is completed. Student must also earn at least four credits of BIOL 49400 or 49900 research.

Consult with your academic advisor for the forms used to obtain Research Mentor for each objective.

A combination of courses and research may be used to meet this requirement.

¹ This may count for the Intermediate Biology Selective and as a Group B course and as the CoS Teambuilding & Collaboration requirement.

² These courses are recommended for teaching majors.

³ Courses chosen for the Intermediate Requirement may satisfy part of the 10 credit requirement.

⁴ This course may count for a Group A course and for the Base Lab requirement. You must still complete 10 total credits of biology selectives.

⁵ This course may count for a Group A course and as the College of Science Multidisciplinary requirement.

⁶ This course may count for a Group B course and as the College of Science Great Issues requirement.

⁷ This course may count for a Group B course and toward the Biology Lab Selective. However, you must still complete 10 total credits of biology selectives.
